Discription

ProLink FIBER Termination Box , 8-CORE Metal

The terminal box is designed for indoor optical fiber cable termination. It allows termination of fiber optic cables by splicing pigtails inside a metallic ruggedized enclosure suitable for indoor environments only.

The box includes a splice cassette for mechanical splice protection and provides entry for up to two optical fiber cables.

It supports the installation of up to eight LC connector patch cords and includes one universal cable output port for flexible routing or future expansion.

The metallic construction ensures high durability, effective splice protection, and long service life in indoor network environments.

Features

-  Wall mountable.
-  Easy access to cables, pigtails and patch cords during installation, maintenance and/or upgrade.
-  Secure, industry standard high impact Metal cover
-  Anti-UV, Ultra violet resistant
-  Minimum value of bend radius is 30 mm
-  Can house 40-60 mm splice protectors
